Authors’ Rights & Copyright

Colby’s Open Access Repository

March 3, 2009
COPYRIGHT TRANSFER

The undersigned, with the consent of all authors, hereby transfers, to the extent that there is copyright to be transferred, the exclusive copyright interest in the above cited manuscript, including the published version in any format (subsequently called the "work"), to the American Chemical Society subject to the following: (If the manuscript is not accepted by ACS or withdrawn prior to acceptance by ACS, this transfer will be null and void.)

A. The undersigned author and all coauthors retain the right to revise, adapt, prepare derivative works, present orally, or distribute or transmit to not more than 50 colleagues, their own paper, provided that copyright credit is given to the source and ACS, that recipients are informed that they may not further disseminate or copy the paper, and that all such use is for the personal noncommercial benefit of the author(s) and is consistent with any prior contractual agreement between the undersigned and/or coauthors and their employer(s). Authors/employers may post on the Web, the title of the paper, abstract (no other text), tables, and figures of their own papers on their own Web sites, and to include these items in their own scholarly, research papers.

B. Where a work is prepared as a "work made for hire" for an employer, the employer(s) of the author(s) retain(s) the right to revise, adapt, prepare derivative works, publish, reprint, reproduce, and distribute the work in print format, and to transmit it on an internal, secure network for use by its employees only, and additional rights under A, provided that all such use is for the promotion of its business enterprise and does not imply endorsement by ACS.

C. Whenever the American Chemical Society is approached by third parties for individual permission to use, reprint, or republish specified articles (except for classroom use, library reserve, or to reprint in a collective work) the undersigned author's or employer's permission will also be required.

D. No proprietary right other than copyright is claimed by the American Chemical Society.

E. For works prepared under U.S. Government contract or by employees of a foreign government or its instrumentalities, the American Chemical Society recognizes that government's prior nonexclusive, royalty-free license to publish, translate, reproduce, use, or dispose of the published form of the work, or allow others to do so for noncommercial government purposes. State contract number: ____________________________

SIGN HERE FOR COPYRIGHT TRANSFER: I hereby certify that I am authorized to sign this document either in my own right or as an agent for my employer, and have made no changes to the current valid document supplied by ACS.

Print Authorized Name(s) and Title(s)

Original Signature(s) (in ink)

CERTIFICATION AS A WORK OF THE U.S. GOVERNMENT

I certify that ALL authors are or were bona fide officers or employees of the U.S. Government when the paper was prepared, and that the work is a "work of the U.S. Government" (prepared by an officer/employee of the U.S. Government as part of official duties), and, therefore, it is not subject to U.S. copyright. (This section should NOT be signed if the work was prepared under a government contract or coauthored by a non-U.S. Government employee.)

INDIVIDUAL AUTHOR OR AGENCY REPRESENTATIVE
Copyright Transfer Agreement:

“The IUBMB shall, in consideration of publication, become entitled to the work copyright & translation rights therein & that I/we assign all copyrights in the paper to IUBMB for publication in printed & electronic forms.”
Copyright Agreement

This Agreement, dated ________________ (date), is by and between ALGEBRAIC AND GEOMETRIC TOPOLOGY, the "Journal", and ________________________ (author's name), the "Author". In consideration of the following mutual undertakings, it is agreed:

1. The Author has created a work entitled

______________________________ (title of paper)

(the "Work") and owns the copyright to the Work.

2. Author hereby grants to the Journal a worldwide, perpetual, irrevocable, fully-paid up, royalty-free license to publish the Work in the Journal, its electronic archive, its paper archive, or any collection of the Journal's works in any form whatsoever. Journal shall have the right to include the Work as part of its collection available on interlibrary loan.

3. The Author agrees that s/he shall not publish the Work in any other Journal, whether electronic or otherwise, in the same or substantially the same form as the Work, without acknowledging prior publication in this Journal.

4. The Author warrants that s/he has the full power and authority to enter into this Agreement and to grant the rights granted in this Agreement.

5. The Journal undertakes to publish the Work by placing it on the Journal's server and maintain copies of the Work in accordance with its Archive Policy.

6. This Agreement shall become effective and binding at the date of formal acceptance of the Work for publication by the Journal.

Why retain rights?

- More important in digital environment
- Flexibility to augment distribution of content
- Increase use, increase impact, increase reward
- Copyright law gives creator exclusive right to disseminate unless you sign it away
- Funding agencies requiring Open Access
On January 11, 2008, the National Institutes of Health (NIH) announced a revision to its Public Access Policy. The policy now requires eligible researchers to deposit copies of final manuscripts upon acceptance into a peer-reviewed journal so that they may be made publicly available within 12 months of publication. This policy applies to any journal articles resulting from research supported in whole or in part by direct funds from NIH. The manuscript is defined as the final version accepted for journal publication and includes all modifications from the publishing and peer-review process.

The NIH has provided a comprehensive set of resources to explain the details of the policy:

- [The text of the law](#)
- [The full NIH policy](#)
- [How to comply](#)
- [How to deposit in PubMed Central](#)
- [Frequently asked questions](#) (Updated May 5, 2008)

The NIH also tracks submission rates and statistics:

Scholar's Copyright Addendum Engine

The Scholar's Copyright Addendum Engine will help you generate a PDF form that you can attach to a journal publisher’s copyright agreement to ensure that you retain certain rights.

(get started)

Description

Each addendum gives you non-exclusive rights to create derivative works from your Article and to reproduce, distribute, publicly perform, and publicly display your article in connection with your teaching, conference presentations, lectures, other scholarly works, and professional activities. However, they differ with respect to how soon you can make the final published version available and whether you can authorize others to re-use your work in various ways. Below is a summary of the available options.

Science Commons / SPARC Addendum

Access - Reuse:
You retain sufficient rights to grant to the reading public a Creative Commons Attribution Non-Commercial license or similar license that allows the public to re-use or re-post your article so long as you are given credit as the author and so long as the reader’s use is non-commercial. (This is a joint offering from Science Commons and SPARC and represents a new version of the former SPARC Addendum.)

Other Options From Science Commons

Immediate Access:
You retain sufficient rights to post a copy of the published version of your article (usually in pdf form) online immediately to a site that does not charge for access to the article. (This is similar in many ways to the MIT Copyright Amendment below)
Allow your institution to disseminate your scholarship
