

Confluence Directions

The following are some directions for using the Confluence Wiki

(reference: <http://elandingstest.alaska.gov/confluence/display/lc/Learn+Confluence>)

Confluence is a [wiki](#). Wiki-wiki is Hawaiian for very quick. A wiki has been defined as *the simplest online database that could possibly work*. A wiki allows for *simple and quick web publishing* by a group of people.

Below are instructions to complete your homework assignment. For a more complete tutorial, follow the link at the bottom of the page.

How to Edit a Wiki Page (Note: for full editing capabilities, Mac users should use Firefox and PC users Firefox or Internet Explorer)

Editing a wiki page is quite simple. You don't need to download the page to your computer. To edit: just select the edit tab (top of the page), type in your changes/additions, and then press the Save button. (*I wouldn't recommend making a lot of changes to this page... be patient, you will have your own page to play with soon!*)

How to Learn Confluence

The following tutorial emphasizes learning by doing. Please progress through the examples and then try adding your data to your orientation Wiki.
