

Project 5 - Lists

Purpose

The purpose of this lab was to use alpha blending and effects to create a collage. Also the purpose was to utilize lists to make more organized code.

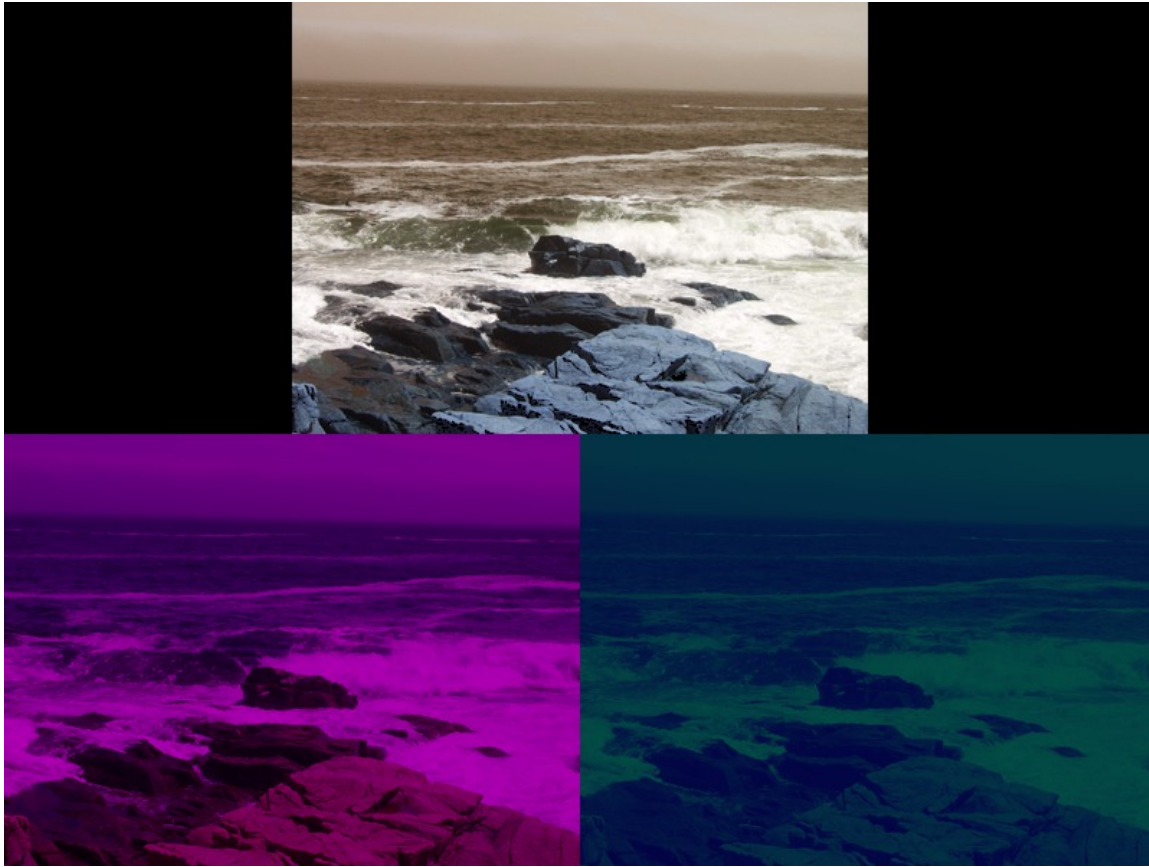

Task One

Image one was to create a collage with 5 different pictures, one being a picture of myself. I create 4 effects, swapRedBlue, swapGreenBlue, noGreen, and rando. Each one manipulates the color pixels. The alpha blending works well in this image because the pictures overlap.

Task Two

Image two was to create a collage in the shape of a triangle. I used different effects on each picture.

What I Learned

In this lab I learned how to use alpha blending and how to manipulate color pixels by using different effects. Also I learned better code organization by using lists.
