

Summer Undergraduate Research in Chemistry at Lehigh University

The Chemistry Department at Lehigh University provides undergraduate students with unique summer research opportunities under the mentorship of a research-university faculty. Students in this program will be engaged in all aspects of research aimed at the discovery and communication of new scientific knowledge. They will gain not only practical experience, but also the complementary perspectives of both academic and industrial mentors on the conduct of chemical and biochemical research.

The Chemistry Department has grown tremendously over the past 3-4 years, with the addition of several new faculty members and significant enhancements to the research and teaching infrastructure. Lehigh University is committed to excellence in education at both the undergraduate and graduate levels, as well as to the advancement of science. As a result, our faculty mentors are highly recognized scholars engaged in cutting-edge research aimed at publishable results.

Students in the program will conduct research over a 10-week period, beginning in June and ending in August. A stipend of \$3000 will be provided, as well as paid campus housing. The application deadline is March 15, 2009. You can apply online using the link below.
