

North Pond

1 2008 North Pond Secchi

2 2008 North Pond Water Column Data

2008 North Pond Secchi

The following graph shows the North Pond secchi depths taken in three locations. The Secchi depths track at all stations indicating that the lake is well mixed horizontally. The green line at two meters represents the standard secchi depth for algal blooms. The data used in the graph can be seen in the following [North Pond Secchi 2008.xls](#);

2008 North Pond Water Column Data

The attached Exel file contains data collected by the University of Maine tabulating North Pond temperature and oxygen concentrations. [UMO East and North oxygen temp profiles.xls](#).
